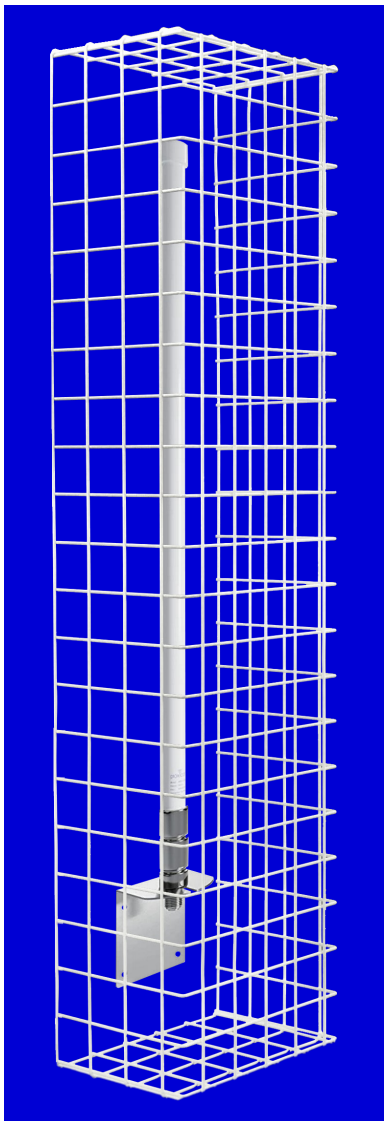
Designing Products that Protect

Model:
CSGW 9407
Antenna Wire Guard

DESCRIPTION

The **CSGW 9407** network device guard protects range expanders and wireless access points from accidental damage. The wire grid features a high percentage of open area for optimal signal transfer, while ensuring a strong layer of protection for the device inside. Network device guards are used in applications including, but not limited to:

- Correctional
- Government
- Commercial
- Educational
- Medical
- Industrial
- Hospitality
- Religious
- Recreational & Athletic organizations



(Devices shown for display purposes only)
